MILITARY SPACE OPERATIONS: PLANNING, FUNDING, AND ACQUISITION CHALLENGES FACING EFFORTS TO STRENGTHEN SPACE CONTROL: GAO-02-738

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 26 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. The United States is increasingly dependent on space for its security and well being. The Department of Defense (DOD) space systems collect information on capabilities and intentions of potential adversaries. They enable military forces to be warned of a missile attack and to communicate and navigate while avoiding hostile action. DOD's efforts to strengthen space control are targeted at seeking to promote better coordination among DOD components, prioritization of projects, visibility and accountability over funding, and interoperability among systems. Among other things, DOD is drafting a space control strategy that is to outline objectives, tasks, and capabilities for the next 20 years. It has also aggregated funding for space programs so that it can compare space funding, including space control funding, to its total budget, make decisions about priorities, and conduct future-trend analyses. In addition, DOD has changed its acquisition policy to include separating technology development from product development and encouraging an evolutionary, or phased, approach to development. There are, however, substantial challenges to making DOD's space control efforts successful. One challenge is putting needed plans in place to provide direction and hold the services accountable for implementing departmentwide priorities for space control. Further, DOD's draft space control strategy has been completed and does not yet define roles and responsibilities among the services, departmentwide priorities and end states, and concrete milestones. Finally DOD's aggregation of space funding is not a plan that targets investments at priority areas for DOD overall. This item ships from La Vergne, TN. Paperback.
