RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 20 pages. Original publisher: Greenbelt, Md. : National Aeronautics and Space Administration, Goddard Space Flight Center, 1989. OCLC Number: (OCoLC)55129615 Subject: Silicon carbide. Excerpt: . . . SUMMARY 4. The plane strain fracture toughness of the tested SiC 6061-T6 A1 composite extrusion has been determined as 6 K , , 8. 9 E399 MPa by testing Compact Specimens according to ASTM Standard. Threshold instensity stress A 2 as under which crack ceases to grow in the material is estimated MPa C m. T hese results compare well Kth with data on other similar composites reported in the open literature. Although the specimens failed by brittle fracture in the tests, the failure mechanism of the material involved K , , plastic deformation seen in the fractographs. There were no fatigue striations in the fracture morphology in areas as of fatigue precrack. Such anomalies can be attributed to the complicated nature of SUA1c omposites as indicated type of void and by sites the uncertainty in defining the nucleation the appearance of the damage zone fracture process I). Fracture mechanics specimens of Mh4C materials can be successfully precracked with controlled crack lengths by of means compressive fatigue loading to initiate the crack followed by tensile fatigue to complete the process. kcrack-I ing with compressive fatigue only may influence the test results. 12 This item ships from La Vergne,TN. Paperback.
