The purpose of this term s Geography work is to broaden the pupil s knowledge of geographical facts by observation, and to render this knowledge more definite by discussion. Your success will be measured by the disposition of your class to observe natural phenomena about them. 2. Instruction is local and observational, as in the first and second years. 3. The work of previous grades in position, distance, direction, form, and size should be continued, and made to take more definite form as an aid to Georgraphy. 4. Introductory to the study of the natural divisions of land and water, study water as a force, as follows: --(a) Water flowing over the land; (b) Water in the air; (c)...
